1. Uvod

1.1 Korišćeni programski jezici/tehnologije

Za potrebe sajta korišćene su sledeće tehnologije:

- HTML
- PHP
- CSS
- Materialize CSS
- JavaScript
- jQuery
- Visual Studio Code

1.2 Opis funkcionalnosti

Note: Ukoliko + ikonica kao I delete dugme ne rade, molim vas hard refreshujte(shift+f5). Hvala

Funkcionalnosti sajta su sledeće:

- Meni se ispisuje u zavisnosti da li je korisnik ulogovan ili nije. Kad je korisnik ulogovan ima link za log out i prikazuje se cart ikonica. U slučaju da je admin ulogovan, postoji link ka stranici Admin.
- Futer se ispisuje na svakoj stranici pomoću Includ-a

Index.php

- Na index stranici se dinamički učitava meni iz baze podataka.
- Na index stranici se nalazi link koji vodi na stranicu store.php

Store.php

- Na stranici store.php se za korisnika koji je ulogovan, koji nije ulogovan i admin korisnika različito prikazuje sadržaj
- Checkboxovi za kategorije i brend se dinamički dohvataju i prikazuju iz baze podataka
- Klikom na – (minus) kod kategorija i brendova se pravi efekat padajuće liste
- Kada korisnik nije ulogovan dugme za dodavanje u korpu je disablovano
- Kada je korisnik ulogovan on može da klikne na dugme za dodavanje u korpu
- Kada je admin ulogovan na početku proizvoda se nalazi plus znak kojim se otvara modal u kom se popunjavaju podaci o artiklu koji se zeli uneti u bazu. Forma u modalu je regulisana regularnim izrazima. Kada je sve popunjeno kako treba artika se dodaje u bazu podataka, stranica se refreshuje i kao poslednji element se može videti dodati element
- Takođe kada je admin ulogovan on može izbrisati proizvod klikom na dugme delete koje se prikazuje samo admin korisniku. Uvek će se pre uklanjanja pojaviti pop up kojim će se potvrditi brisanje ili odustati od njega.

- Pri popunjavanju forme za unos proizvoda admin mora ubaciti sliku koja će biti uploadovana u novi folder koji je nazvan `uploaded_img` i dobiti ime na osnovu timestampa + regularno ime čime neće doći do stvaranje istih naziva slika.
- Na dnu stranice se nalazi paginacija čiji broj je dinamički i zavisi od broja produkata u bazi.

Contact.php

- U kontakt sekciji se nalazi forma za slanje poruke.
- Forma je regulisana regularnim izrazima.
- Submitovanjem poruke dobiće se poruka o uspesno realizovanom upisu u bazu podataka, kao i u slučaju greške će se pojaviti crvenom bojom da je došlo do problema.

Admin.php

- Admin panelu je moguće pristupiti samo sa administratorskim nalogom. U svakom drugom slučaju korisnik će biti preusmeren na stranicu `index.php`
- U admin panelu sa leve strane se nalazi navigacioni meni kojim se u svakom trenutku admin može vratiti na početnu stranicu kao i ostale stranice. Ovaj meni je dinamički učitani iz baze podataka.
- Na početnoj admin stranici se može videti ukupan broj proizvoda koji se dinamički menja na osnovu baze podataka kao i ukupan broj korisnika i broj admina koji su takođe učitani iz baze podataka.
- Ispod toga se nalazi tabela u kojoj se nalazi svi proizvodi iz baze podataka i taster delete kojim se proizvod u potpunosti briše iz baze podataka.
- U tabu Tables se nalaze linkovi koji vode do svih korisnika i poruka koji su u istom stilu urađeni i proizvodi gde se klikom na delete dugme u potpunosti briše korisnik ili poruka iz baze podataka.
- U tabelama products, users, kao i brands je moguće dodati nov produkt, novog korisnika koji bira iz dinamičkog padajućeg menija ulogu kao i novi brend. Takođe je moguće brisanje svakog od produkata kao i brendova poruka ili korisnika.
- Zbog većeg broja produkata, u admin-panelu je takođe dodata paginacija. Na svakoj stranici paginacije se nalazi plus taster kojim se otvara modal u koji kada se unesu ispravni podaci dodaje taj artikal u bazu podataka.

Logout.php

- Klikom na logout se korisnik logout-uje, i briše se sesija kojom je rađena logija logovanja.

Login.php

- Na ovoj stranici se nalazi forma u kojoj se nalaze 2 polja. Email i Password koji su regulisani regularnim izrazima.
- Upisivanjem pogrešnih kredencijala će se dobiti greška ispod forme uokvirena crvenom bojom, dok se upisivanjem korektnih kredencijala upisati poruka o uspešnom logovanju i nakon 1.5s će korisnik biti preusmeren na stranicu `index.php`

Register.php

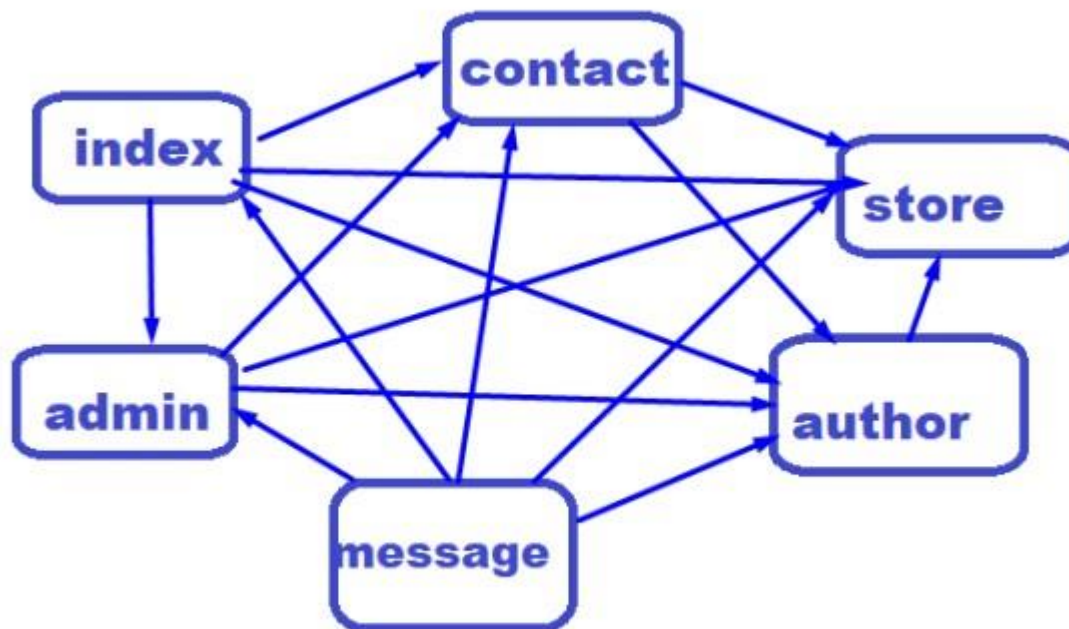

- Na ovoj stranici se korisnik može registrovati.
- Ovde se nalaze polja koja su regulisana regularnim izrazima i dobrim unosom podataka u ova polja korisnik će dobiti poruku o uspešnoj registraciji i biće upisan u bazu podataka što admin u admin panelu će videti u sekciji za korisnike.

1.3 Template

Za izradu sajta nije korišćen template. Sajt je ručno rađen uz pomoć Materialize CSS-a uz dodatke custom css-a.

2. Organizacija

2.1 Organizaciona šema

2.2 Mapa sajta
